CROSS MEDIA DESIGN I / FINAL FESTIVAL PACKAGE

MEND FORMATION

MAKE MORE. WASTE LESS.

FINAL PROTOTYPE

Open the interactive MENDFORMATION prototype in Figma

OVERVIEW

A FESTIVAL BUILT TO RECONSTRUCT

A launch-ready concept package built around a single action: buying secondhand can open the door to making something new.

01 TOUCHPOINT

The Second Chance Ticket: a four-screen digital reward connected to thrift shopping.

02 CAMPAIGN

A key visual and phased assets across website, campus, bus-stop and festival signage.

03 MOTION

An industrial reconstruction animation, with heated weld seams.

04 CHANNELS

A six-channel plan spanning awareness, participation and follow-up.

05 TESTING

Documented prototype iterations, participant observations and feedback decisions.

01 / CORE TOUCHPOINT

THE SECOND CHANCE TICKET

A reward for choosing secondhand, not for choosing a particular payment method.

THE MEDIUM

I designed a mobile payment-confirmation-to-ticket experience. At a participating thrift store, a secondhand purchase leads my persona to a festival invitation, registration and a free-entry pass.

THE KEY MOMENT

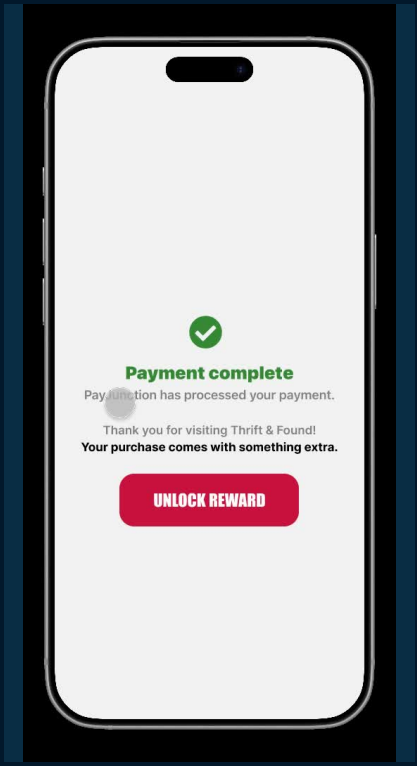

After purchasing a secondhand item, my persona discovers an unexpected reward. She unlocks a MENDFORMATION invitation, claims a ticket, and feels curious, surprised and welcome.

PROPOSED VENUE

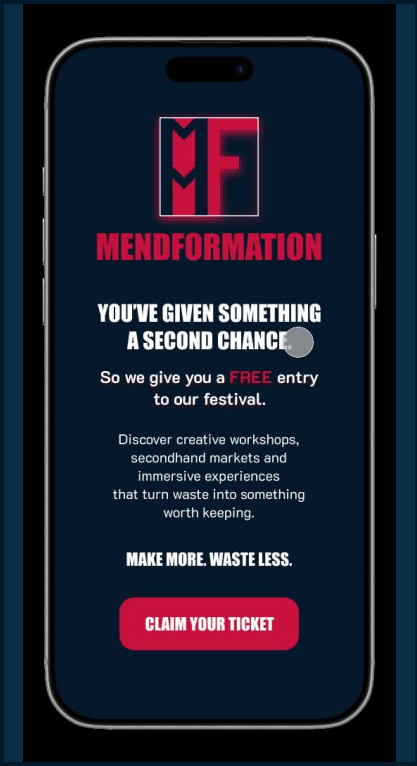

Grand-Place, Brussels / Proposed festival site

FOUR SCREENS. ONE INVITATION.

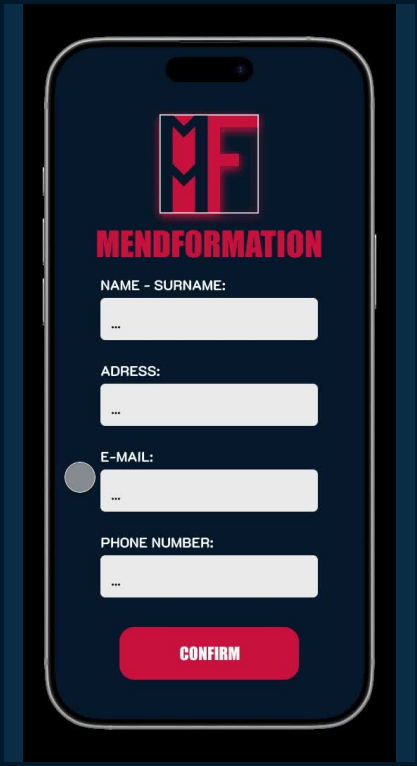

Four stages connect a secondhand purchase with a clear invitation and digital entry experience.

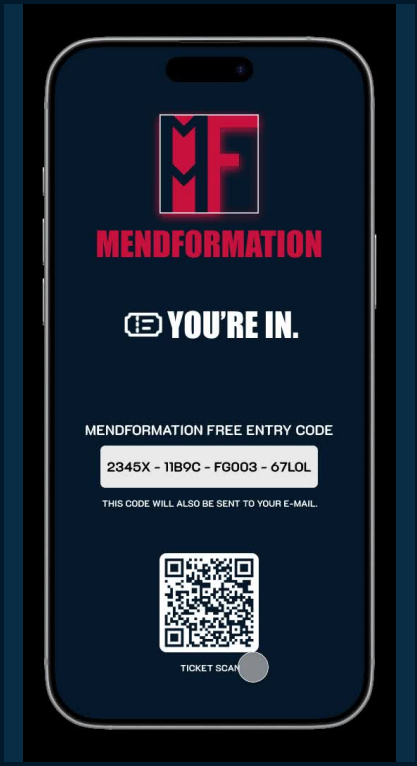

01 / PAYMENT

02 / REWARD

03 / REGISTER

04 / TICKET

01 / CORE TOUCHPOINT

FROM PURCHASE TO PARTICIPATION

Digital interactions are deliberately short. The reward appears immediately after a secondhand purchase.

01

PURCHASE

My persona buys a secondhand item at a participating store.

02

REVEAL

She taps UNLOCK REWARD to discover MENDFORMATION.

03

CLAIM

She confirms her details on the registration screen.

04

ENTRY

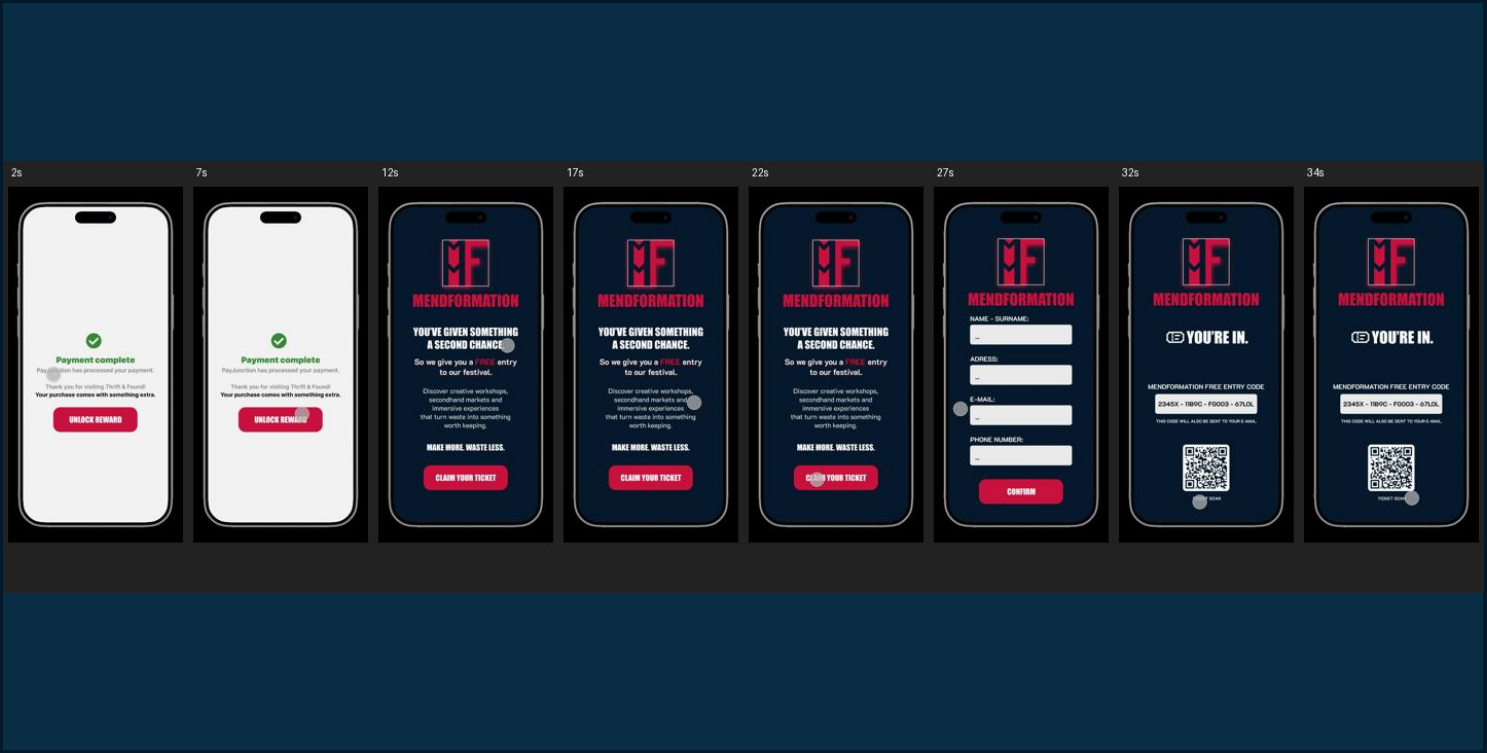

A demonstrational QR code and ticket code appear.

REAL-WORLD INTEGRATION

A partner shop would need a payment/receipt integration and single-use reward codes. Cash customers could receive a claim QR on their receipt, opening the same digital flow.

THE KEY MOMENT ON VIDEO

I present the complete touchpoint in a silent, subtitled walkthrough submitted as separate media.

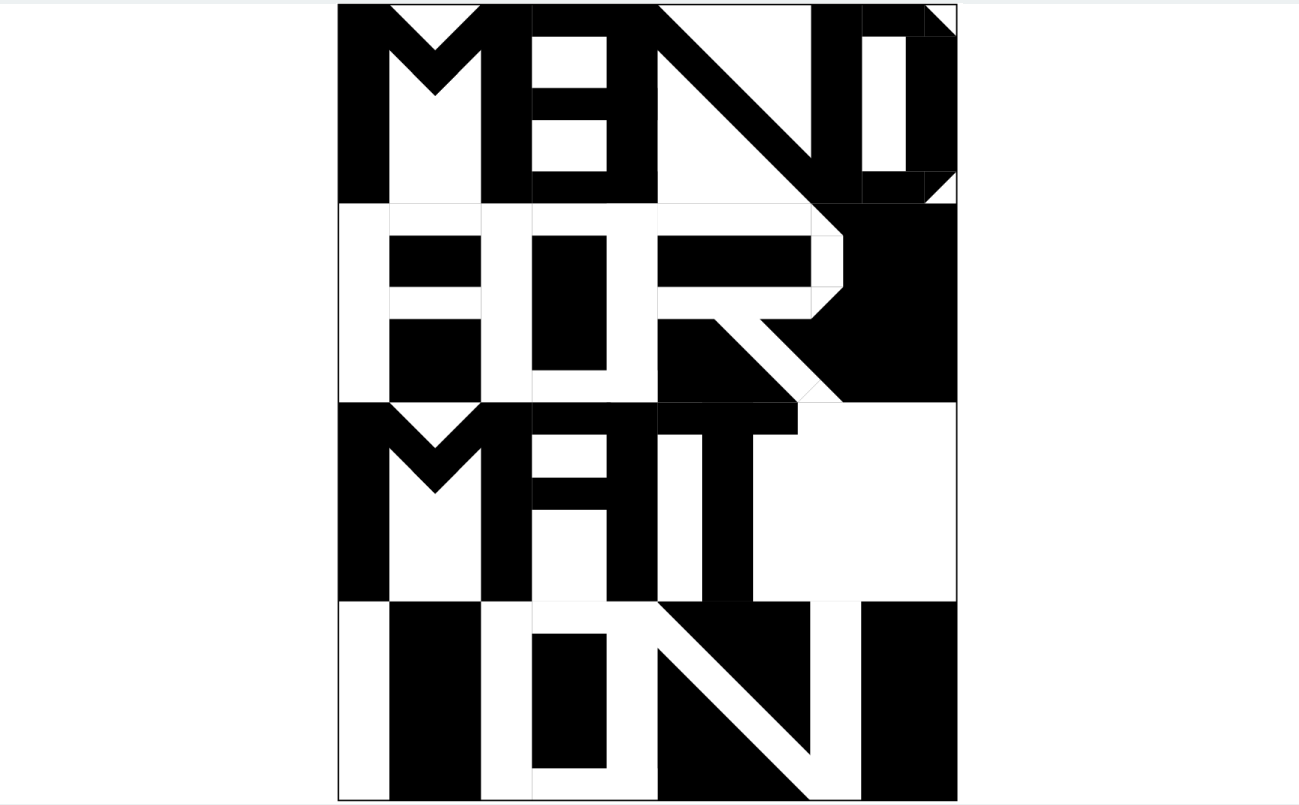

FULL WALKTHROUGH

The full subtitled walkthrough accompanies my Canvas submission.

The recording follows payment confirmation, reward discovery, registration and the final ticket screen without voice-over.

ONE IDENTITY. ONE IDEA.

My geometric wordmark is both the primary festival identity and the centre of the campaign.

KEY VISUAL

Interlocking, modular letterforms echo fragments being reconstructed into a complete object.

MASTER LINE

MAKE MORE.
WASTE LESS.

Original geometric MENDFORMATION mark.

THREE PHASES. ONE STORY.

Tease the act of reconstruction, reveal the festival, then direct visitors to participate.

TEASER

SOMETHING IS BEING REBUILT. Website banner. A curiosity trigger before the festival.

LAUNCH

THE CITY REBUILDS. Campus poster. Name, offer and festival invitation.

DURING

DON’T JUST LOOK. CREATE. On-site signage directs people toward activities.

ADDITIONAL REACH

Digital bus-stop screen / “TRASH? THINK AGAIN.”

SOMETHING IS BEING REBUILT.

WEBSITE PLACEMENT / BEFORE LAUNCH

CHANNEL

Sponsored website banner

EXPORT

300 × 250 PNG for banner delivery. Larger 1200 × 1000 source artwork retained.

ROLE

Create curiosity without revealing the entire experience.

THE CITY REBUILDS.

CAMPUS POSTER / LAUNCH PHASE

FORMAT

A3 print poster

Print-ready layout export supplied as PDF. The festival site is Grand-Place, Brussels (proposed concept location).

BEHAVIOUR

Move from awareness toward discovery of the festival and its activities.

DON’T JUST LOOK. CREATE.

ON-SITE FESTIVAL SIGN / DURING PHASE

FORMAT

A2 festival sign

Signage organizes the RE:CREATE / RE:TRADE / RE:THINK experience through a consistent navy-crimson, brutalist identity.

BEHAVIOUR

Help visitors enter, navigate and actively participate rather than passively observe.

TRASH? THINK AGAIN.

DIGITAL BUS-STOP SCREEN / PRE-FESTIVAL

FORMAT

1080 × 1920 / vertical

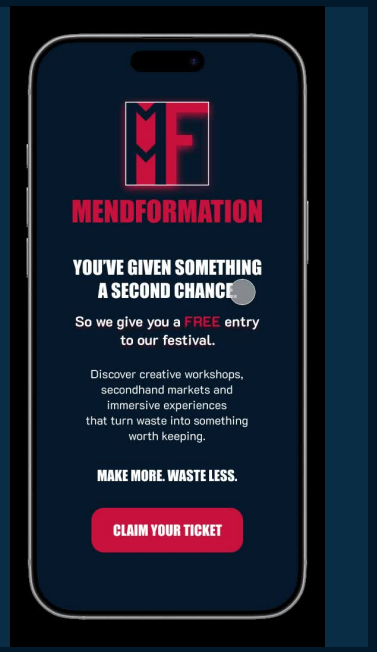

A vertical screen creative that repeats the geometric campaign language, prompting commuters to reconsider discarded objects.

ROLE

Brings the campaign into the daily public-transport journey.

FOUR CHANNELS, ONE EXPERIENCE

A single modular visual language remains recognisable across purchase, website, poster and physical space.

THRIFT CHECKOUT

WEBSITE

CAMPUS

BUS STOP

RECONSTRUCTION IN MOTION

The movement embodies MENDFORMATION: separated geometry converges, joins and becomes one visual identity.

00–09s

ASSEMBLE

Fragments arrive rapidly, one after another, from different directions.

09–14s

WELD

A heated tracing effect joins lines and cools into the finished mark.

14–END

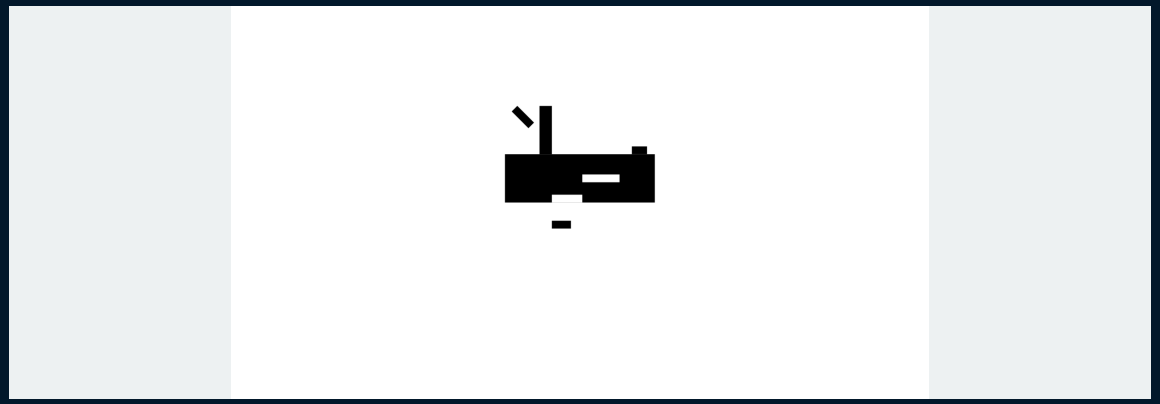

HOLD

The completed wordmark stays on screen as a final identity reveal.

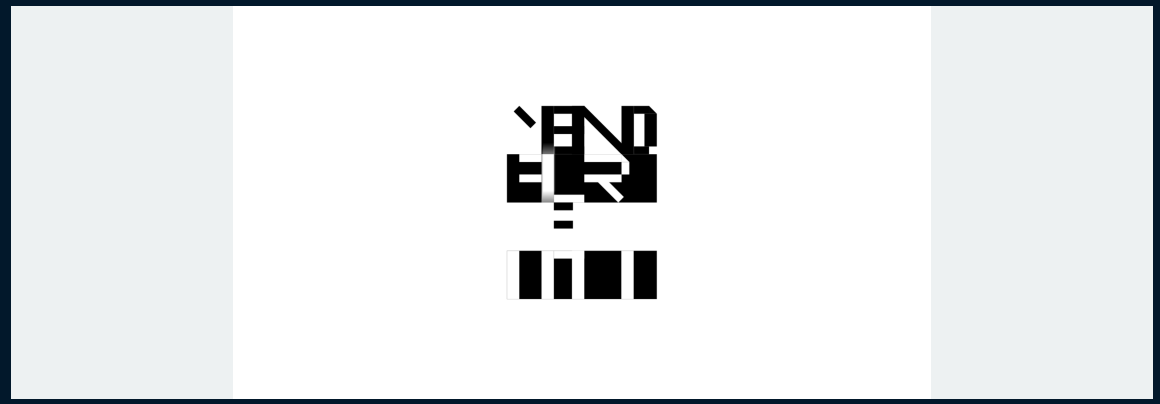

The complete motion animation accompanies my Canvas submission.

FOUR KEY MOMENTS

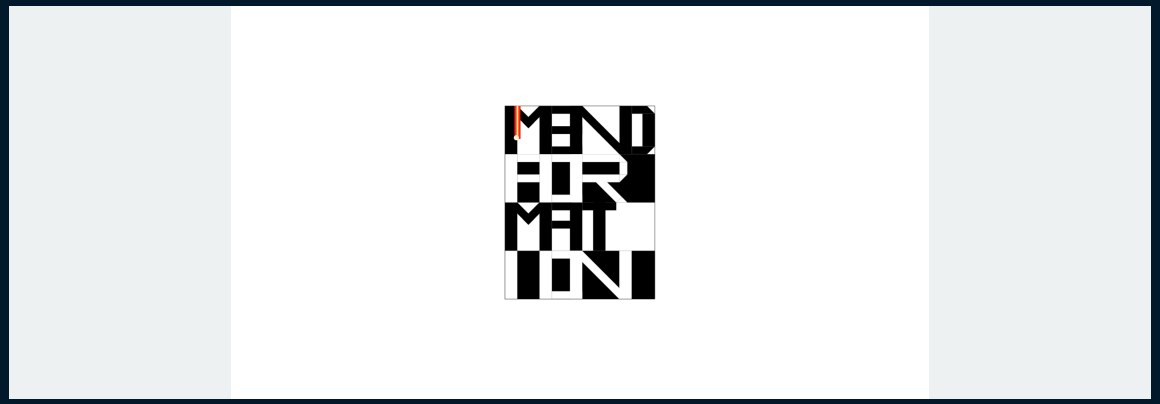

Stills exported from the completed logo animation; these same images support D-6 motion rules.

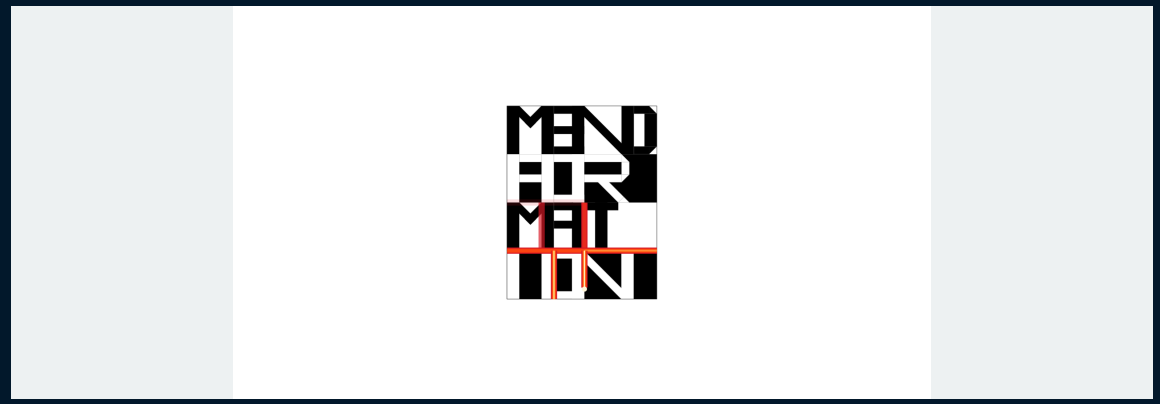

01 SEPARATED

02 CONVERGING

03 WELDING

04 RESOLVED

SIX CHANNELS, ONE JOURNEY

Updated from D-3 with available supplier pricing for printed materials and campaign activation costs.

CHANNEL	GOAL	FORMAT	SPEC / COST	WHEN	MEASURE
Thrift checkout	Reward reuse	Mobile flow	390×844 / Figma €0	At purchase	Claims
Bus-stop screen	Catch attention	Digital poster	1080×1920 / partnership	-2 weeks	Scans
Website banner	Build curiosity	Static banner	300×250 / own design €0	-3 weeks	CTR
Campus poster	Student reach	A3 poster	A3 / €1.20 each*	-2 weeks	Scans
Festival signage	Wayfinding	A2 sign	A2 / €1.69 each*	During	Wayfinding
Follow-up email	Encourage reuse	Email	HTML / own layout €0	After	Clicks

*Reference unit prices: Maxi-Print (A3 colour, 80g); Plotdirect (A2). Distribution is campaign-dependent.

CAMPAIGN RHYTHM

A simple staged calendar connects the campaign assets to the Second Chance Ticket.

-3 WEEKS	**Teaser website banner** Introduce the visual mystery.
-2 WEEKS	**Campus poster + bus stop** Reveal the festival and invite interest.
AT PURCHASE	**Second Chance Ticket** Reward visitors at a participating thrift store.
DURING	**Festival signage** Guide visitors into making and exchanging.
AFTER	**Follow-up email** Encourage repairs and reuse at home.

TESTING APPROACH

Prototype refinement and post-pitch evaluation shaped the final interaction and campaign communication.

WHAT WAS TESTED

Whether a visitor understands the reward invitation, navigates from the festival offer toward claiming a ticket, and recognizes the registration screen as part of the process.

AVAILABLE MATERIAL

V1 and revised prototype screens, feedback on alignment, three post-pitch stakeholder forms, and a recorded post-pitch participant walkthrough.

Method: observation of a participant navigating the clickable prototype, supported by stakeholder feedback after the pitch.

WHAT CHANGED, AND WHY

The prototype evolved from a short reward sequence into a clearer four-screen claim journey.

V1 / FIRST

3 screens: payment, invitation, ticket. Some spacing and text felt floaty.

V2 / REVISED

Registration step added; text alignment and spacing tightened; watermark shadow introduced.

FINAL / POST-PITCH

Four-screen journey retained. No additional prototype edits after the pitch.

FEEDBACK RESPONSE

“Floaty” elements and inconsistent text positioning clearer alignment and more controlled spacing. The registration step and logo shadow were additional refinements, not attributed to a particular tester.

POST-PITCH TEST & DECISIONS

I reviewed the final prototype after the pitch and considered feedback on accessibility and festival communication.

VENUE AND ACTIVITIES

Proposed location: Grand-Place, Brussels. Promotional materials also illustrate repairing clothes, reworking electronics and trading secondhand goods.

BRUTALIST IDENTITY

The modular lettering evokes reconstruction. Structured grids, navy and crimson unify posters, ticket screens and physical signage.

PAYMENT ACCESS

A store can offer the same ticket to cash buyers through a printed unique QR-code coupon or receipt; electronic payments show the reward digitally.

USER INTERACTION

The post-pitch tester navigated the offer and attempted the form inputs. This informed the distinction between registration design and ticket confirmation.

DESIGN DECISION The digital claim screen is shared by both payment routes, keeping the experience consistent.

POST-PITCH / STAKEHOLDER FEEDBACK

FROM QUESTIONS TO CLEARER DECISIONS

Sponsor, organiser and audience perspectives helped me clarify the festival experience and its practical requirements.

SPONSOR

“Recycling waste is highly relevant nowadays.” Asked for concrete examples of what visitors can create.

ORGANISER

Noted that many tools would be needed. Suggested broader touchpoints and asked where the festival would take place.

AUDIENCE

Remembered the recycling workshops; raised questions about online tickets and payment access.

MY DESIGN RESPONSES

Grand-Place, Brussels is named as the proposed location. Activities are illustrated with upcycling workshops, repair stations and the secondhand market. Tools are shared across supervised workshop zones.

Visitors paying cash receive a unique claim code on a shop receipt or coupon. Electronic and cash purchases lead to the same festival ticket flow, preserving the central idea: reuse is rewarded.
